Questions? Feedback?

The structure should follow goals and purpose. That way, different players can contribute their different strengths, making this coalition more effective

Composition of the interim steering committee needs to be diverse

Interim steering committee terms should be staggered so they don't all finish at the same time

Questions? Feedback?

I am curious to hear more about the conversations that have been had re: distinguishing GREEN from other efforts to avoid duplication. Is this distinction the composition of members? The nature of activities? The specific objective/impact sought? The type of donors and their priorities?

agree that focus on advancing KNOWLEDGE and EVIDENCE in this space would differentiate from associations that mostly profile members

focus: Effective Approaches and Interventions / evidence from the field would be great focal point

As IPs. Perhaps a focus on generating evidence of impact and M&E of small pilots, action research...help make the case for donors

Next steps

Next steps...
